## ASTERS, NEW DWARF HYBRIDS

A new and entirely distinct type that seldom exceeds a height of 12 inches and are completely covered with single flowers during September and October. They are entirely hardy and will be very valuable for edging and rock garden planting. They make a wonderful display when color is badly needed in the rockery. Sure to be in demand.

**Daphne.** A lovely little variety. Compact and free. Pink.

**Lady H. Maddon.** Soft pink—a gem.

**Countess of Dudley.** Clear pink; bushy habit, very free.

**Victor.** Pale clear lavender. The dwarfest of the set.
